Jin does not disclose a mechanism for enabling a selection of a plurality of call agents and call control languages by the user.

It is applicant's understanding that the Examiner generally agreed with Applicant that the claims as amended are patentable over the prior art of record. The Examiner advised that a further search would be conducted upon presentation of the amendment.

Accordingly, Applicant respectfully submits that the rejection of claims 1, 3, 6-10, 12, 14, 16-19 and 24 under 35 U.S.C. § 102 as being anticipated by Jin is moot in view of the above amendments as discussed in the interview. No further response is believed to be necessary.

Applicant also respectfully submits that the rejection of claims 2 and 15 under 35 U.S.C. § 103 as being unpatentable over Jin in view of U.S. Pat. No. 5,473,679 to LaPorta is moot in view of the common assignment of Jin and the present application, i.e.
